

### **List of the tests to assess language and literacy skills in various languages**

In order to acquaint researchers and clinicians with the objective assessments available in different languages, members of the CLC have created a list of standardized tests with some basic information. The list of tests is not exhaustive either in terms of the range of languages, nor the tests included. Members of the CLC do not endorse any of the tests included in the list. The list was created for clinical and research use, and not for marketing or promotion of the tests or their publishers.

If you would like to contribute to the development of the list by adding information about tests available in an additional language or supplementing the tests in an existing list, feel free to contact Jelena Kuvac Kraljevic ([jelena.kuvac@erf.unizg.hr](mailto:jelena.kuvac@erf.unizg.hr)) and Eleni Theodorou ([eleni.theodorou@cut.ac.cy](mailto:eleni.theodorou@cut.ac.cy)) and share your data with us using the template available in a separate file.

Current list of languages:

- Arabic
- Croatian
- English
- Greek
- Icelandic
- Irish
- Portugese (Brazil)
